Get top results with a real sharpening system

THE MOST ADVANCED WATER COOLCED SHARPENING SYSTEM AVAILABLE allows you sharpen your tools to the finest edge. Tormek’s innovative sharpening system has come to be appreciated worldwide for its unbeatable versatility, accuracy and ease of use. T-8 maximises the precision thanks to the revolutionary fully cast housing which guarantees minimal play for the Universal support. This gives you the best conditions to succeed with your sharpening.

Your unique drive system is efficient and manages to hold a constant speed, even under full load. The Tormek Original Grindstone sharpens all qualities of steel, including HSS. The machine features a number of elaborated details, like instant stone locking with EzyLock, water trough with lift and a removable magnet scrape for efficient cleansing. Read more at www.tormek.com
Diamond Wheels Accessories

Special Grindstones

Diamond Wheels Extra Coarse DC-250

For efficient grinding of all types of material, incl. steel, ceramic and carbide. Rapidly repairs a dull or damaged edge. 360 grit.

Diamond Wheels Fine DF-250

For fine surface finish on all types of edge tools. Combines efficient steel removal with smooth surface finish. For all types of material, incl. steel, ceramic and carbide. 650 grit.

Diamond Wheels Extra Fine DE-250

For extra fine surface finish. Sharpens all types of material, incl. steel, ceramic and carbide. Ideal for finely cutting and carving tools, where a minimum of steel removal is needed. 1200 grit. Included with every diamond wheel is 150 ml ACC-150 Anti-Corrosion Concentrate. Tormek Diamond Wheels are EU Design Protected.

Jig and Accessory Kits

New Tormek Case included!

Reviews

Some people have never experienced using a truly sharp tool, but when they do, they will find that it cuts far less force out and it cuts so cleanly that the savings in abrasives alone is significant. Because Tormek regularly improves its system, that’s the brand I selected. Try wet sharpening, like me, you will be amazed at how much better your turning experience is.

Terry Martin
American Woodturner, USA

I have yet to find anything that cannot be sharpened on the Tormek. The honed edge is incredibly fine, and coupled to this dramatic improvement in edge quality is the not insignificant fact that the tools last far longer, as the sharpening process is so much less aggressive. I am now a total convert to the wet grinding system. It really is Touch and Turn, but you touch far less often and sure for more!

Alan Hathaway
The Woodworker, UK

Sharpen all your edge tools

With the wide range of Tormek branded jigs, you can sharpen practically all types of edge tools. Tormek is dedicated to developing water cooled sharpening through innovative solutions!

Exact replication

The say word when sharpening the Tormek way is repeatability. You can shape the tool exactly to your needs. Even complicated shapes such as fingernail turning gauges, spoon carving gauges and oval skew chisels with a radiused edge are easily sharpened.

Cleanest edges

You finish the sharpening process by honing and polishing the edge on the leather honing wheel. You get a razor sharp edge.

Fast sharpening

Once the shape is created, you can remove another fraction of the steel when re-sharpening, which makes it a quick job.

Full control

At this low speed, you have full control of the sharpening and remove no more steel than necessary. An extra benefit is that your tools last longer.

No risk of overheating

There is no risk that the edge becomes overheated and loses its hardness.

Safe and quiet

Worn steel particles are deposited into the water trough, keeping the air clear of grinding dust. No sparks are produced that can be a fire hazard in workshops with a lot of wood dust. You will also find that the Tormek runs surprisingly quietly.

Quality and performance

Buying a Tormek is a safe investment in quality and performance. You will never have to put up with dull tools ever again!
